Re: Hill Road Culvert Bid Tabulation from 03/30/2026 bid opening

Bids were sent out to numerous area contractors experienced with the installation of precast box culverts. The following bids were received with Sam Bourne Excavating, LLC being the low bidder:

1. **Sam Bourne Excavating, LLC: \$242,669**
2. A.S. Clark & Sons: \$357,427

I have not worked with Sam Bourne Excavating, LLC before and am not familiar with his work, however I assisted the Town with the bidding of the Hill Road culvert restoration. According to an email from Sam Bourne, he will be working with Jared Flynn on the restoration of the stone arch culvert. Jared Flynn worked with Brian Post on the restoration of the stone arch in West Townshend, VT

The Town should make sure the temporary easements have been signed by the landowner prior to sending the Notice to Proceed to the awarded contractor.
